Fisheries Certificate Schedule Great Salt Lake Brine Shrimp Fishery

Client/Certificate Holders
Great Salt Lake Brine Shrimp Cooperative, Inc.
dba Great Salt Lake Artemia (GSLA)

Management System: Several departments and boards within the state of Utah have a role in managing the brine shrimp fishery on Great Salt Lake which include the following: the Division of Wildlife Resources; Utah Wildlife Board; Regional Advisory Council, and Division of Forestry, Fire and State Lands. In addition, the Great Salt Lake Advisory Council; Great Salt Lake Technical Team; and Great Salt Lake Salinity Advisory Committee make advisory recommendations that may affect the fishery.

Chain of Custody: The Client, Great Salt Lake Artemia (GSLA) maintains full traceability records for all product identified and sold as certified for the fishery. There are no risks to the traceability system because all product is harvested, processed, packaged, and shipped by the GSLA. The product is packaged in a consumer-ready, tamper proof sealed package with no risk of mixing. There are no other species harvested from the Great Salt Lake as only brine shrimp survive in the hypersaline environment. The point of intended change of ownership of product is when the customer receives the product. CoC is not required for the fishery and CoC begins upon sale of the product from the GSLA. An ecolabel or full CoC would be required if the buyer of the product from the GSLA wanted to sell it as MSC certified.
